

Founded in 1992, KCA Electronics has earned a solid reputation for excellence in the fabrication of high-end rigid, flexible, and rigid flex printed circuit boards for a wide range of customers in the Military, Medical and Commercial industries.

KCA is seeking an experienced candidate for our Lamination department. The ideal candidate should possess:

Press Operation Experience - load and unload press, break down and clean books, good knowledge and use of calipers, computer entry (Cimnet), bake layers.

Black Oxide Operation Experience - knowledge of oxide chemicals, operate oxide line, break down.

Lay-Up Operation Experience - knowledge of raw materials, lay-up of packages, good arithmetic skills.

The ideal candidate will be aware of safety issues and good at identifying problems with the product or machinery.

Education:

High School Diploma or partial High School is acceptable, depending upon experience.

Experience:

Six months to one year in the printed circuit board industry.
